About

Hello Everyone,,

I'm a college student from Universitas Dinamika (Stikom Surabaya). And I majored in Information Systems. I'm currently interested in Web Development on the Back-end Developer. And also I'm studying the PHP framework is Laravel. and as a complement I also learn ReactJS for the Front-end.

Before that I also studied several other programming languages, like :

- Java;
- Web language (HTML, CSS, Javascript);
- PHP;
- SQL (Oracle, MySQL).

On Java I studied about :

- OOP.
- Make desktop applications integrated with MySQL and Oracle.
- Make a mobile app integrated with Firebase.

When in Senior High School, I studied about editing video and photo, and photography. Because of that, I joined the HIMA Information System in university. I joined the communication media division for 1 year or period. And RnD UI/UX in Java Developer Group (JDG).

Outside of programming, I also watch anime, play badminton, and gamer (maybe). Now I play some games like Valorant, Honkai Impact 3, Honkai Star Rail, PES 2017, and Rubik 4×4.

Experiences

Backend Developer

Deus Code • April 2023 - June 2023 • 3mos

I at Deus Code was given a project using Laravel to create an admin panel for UMKM FLS Beaute and Paperus. FLS Beaute admin panel has a multi-user feature consisting of superadmin, distributor, and seller. This admin panel is used to manage sales, product management, and product returns. The Paperus admin panel is used for sales management and product management. The Paperus admin panel is used for the purposes of creating forms, from bidding forms to delivery forms.
