About Me

Hello Everyone,,

My name is Akbar Wibowo Putra, a fresh graduate from Universitas Dinamika majoring in Information Systems, with a strong interest and expertise in web development, particularly in Backend development using the Laravel framework. I have experience in building efficient web applications and am committed to continuously improving my technical skills and providing optimal solutions for business needs through technology development.

Experiences

Backend Developer
Apr 2023 - Jun 2023 · 2mos
Deus Code

- Laravel project related to admin panel for MSME FLS Beaute. The FLS Beaute admin panel has a multi-user feature consisting of superadmin, distributors, and sellers which is used to manage sales, product management, and product returns.
- Laravel project related to admin panel for Paperus. The Paperus admin panel is used for sales management and product management which is used for form creation purposes, from offer forms to delivery.

Communication Media Division
Jan 2021 - Apr 2022 · 1yr 2mos
HMSI Undika

I was responsible for designing Instagram feeds to deliver various important information to students and the academic community, including campus updates, events such as webinars, and competition-related information. In this role, I focused on creating visually appealing and informative content to increase engagement and effectively disseminate information through the university's social media platforms.

`Adobe Photoshop` `Adobe Premiere` `Figma`

RnD UI/UX
Dec 2020 - Jan 2022 · 1yr 1mo
Java Developer Group (JDG)

I played a role in organizing events and competitions held by JDG. Additionally, I studied and developed skills in UI/UX for mobile and website platforms, focusing on creating optimal user experiences and intuitive interface designs.
